第三方模型服務說明

版本號：V1.0

生效日期：2026 年 07 月 10 日

最近更新日期：2026 年 07 月 10 日

第一章 總則

歡迎您使用 APIporter（https://apiporter.com，以下簡稱「本平台」）提供的 AI 模型聚合服務。本平台由 CloudBridge AI Technology Limited 營運，該公司於香港註冊成立。

本平台通過統一接口接入由第三方機構研發、營運或依法授權提供的人工智能模型，爲用戶提供模型調用、賬戶管理、計費結算及相關技術服務。

本《第三方模型服務說明》（以下簡稱“本說明”）旨在幫助您瞭解第三方模型的來源、服務方式、必要的數據流轉及平台與第三方模型服務提供商之間的責任邊界。

本說明是《用戶協議》的組成部分，與《隱私政策》《充值服務協議》《AI 服務使用規範》《數據安全承諾》等平台規則共同適用。如本說明與針對特定事項的專項規則不一致，以依法適用且針對該事項作出明確約定的專項規則爲準。

第二章 第三方模型說明

本平台可能接入的人工智能模型系列包括但不限於：

（一）OpenAI 系列模型；

（二）Anthropic Claude 系列模型；

（三）Google Gemini 系列模型；

（四）xAI Grok 系列模型；

（五）DeepSeek 系列模型；

（六）智譜 AI（GLM）系列模型；

（七）通義千問系列模型；

（八）Kimi（月之暗面）系列模型；

（九）豆包系列模型；

（十）MiniMax 系列模型；

（十一）訊飛星火系列模型;

（十二）平台後續依法接入的其他模型。

上述名單僅用於說明平台可能提供的模型範圍，不表示所有模型均已上線，也不表示同一模型可在全部地區、賬號類型或業務場景中使用。實際可用模型及其適用地區，以用戶調用時產品頁面、控制台、模型清單或 API 文檔公布的信息爲準。

模型名稱、商標及相關標識歸相應權利人所有。除另有明確說明外，平台展示模型名稱不表示平台與相關權利人之間存在代理、授權經銷、聯合營運或其他超出實際合作關係的法律關係。

平台實際提供的模型、版本、功能、上下文長度、服務區域、計費方式及限制條件，以用戶調用時控制台、產品頁面、模型清單或API 文檔公佈的信息爲準。

第三章 平台與第三方模型服務提供商的關係

本平台屬於人工智能模型聚合服務平台。除平台自行開發並明確標識的模型或功能外，本平台通常不是第三方模型的研發者、訓練者或底層算法實現者。

平台主要提供以下服務:

(一) 模型統一接入及請求路由;

(二) 身份認證及訪問控制;

(三) API 網關及請求轉發;

(四) 調用量、Token 或其他計量單位的統計;

(五) 計費、餘額及賬戶管理;

(六) 模型展示、風險提示及必要的內容安全措施;

(七) 故障處理、技術支持及平台營運;

(八) 法律法規要求平台履行的其他義務。

第三方模型服務提供商負責其模型的研發、訓練、算法優化、推理服務、模型側安全策略及相關技術實現，但不因此免除本平台依法應承擔的模型接入管理、服務安全、個人信息保護、數據安全、用戶告知及其他法定義務。

平台將根據適用法律法規、合作模式及風險程度，對第三方模型服務提供商進行必要的選擇、評估、合同約束、安全管理及持續監督。平台不能控制第三方獨立作出的全部技術或營運決策，但將對自身可以控制且依法應負責的事項承擔相應責任。

第四章 數據流轉說明

當您主動選擇使用某一第三方模型時，爲完成模型推理及向您返回結果，平台可能在必要範圍內將相關數據傳輸至依法參與該調用鏈路的模型服務提供商、API 技術服務商、模型聚合服務商、雲計算或網絡基礎設施服務商，以及其他必要服務方。根據具體服務鏈路，上述服務方可能在完成請求所必需的範圍內接觸相關數據。

根據模型及功能不同，傳輸的數據可能包括：

(一) 您輸入的文本及指令（Prompt）；

(二) 您主動上傳的圖片、音頻、視頻、文檔或其他文件；

(三) 實現連續對話所必需的對話上下文；

(四) 模型名稱、版本及推理參數；

(五) 請求編號、接口版本、時間戳及必要的安全或故障排查信息；

(六) 完成特定功能所必需的其他數據。

第三方模型完成推理後，生成結果將返回至平台，再由平台向您展示或通過 API 返回給您。平台原則上僅在實現模型調用、計量計費、安全保障、故障處理及履行法定義務所必需的範圍內處理相關數據。

具體的數據接收方、處理目的、處理方式、數據類型及保存規則可能因模型、服務區域、調用方式和實際供應鏈不同而變化。相關服務鏈路可能包含一層或多層依法參與請求轉發、模型接入或基礎設施服務的提供商，並可能隨模型版本、接口方式或供應關係發生變化。平台將通過《隱私政策》、模型詳情頁、第三方信息清單、控制台提示或其他合理方式向您提供必要信息；依法需要取得同意、單獨同意或書面同意的，平台將另行取得。

第五章 數據處理與責任邊界

平台負責對自身收集、存儲及處理的個人信息和其他受保護數據依法履行保護義務，並按照《隱私政策》及適用法律法規處理相關數據。

第三方模型服務提供商對接收數據的處理角色可能不同：部分情形下，其可能受平台委託處理數據；部分情形下，其可能依法作爲獨立的個人信息處理者或數據控制者處理數據。平台將根據實際合作關係明確相應角色，並依法履行告知、合同約束、安全評估及監督管理等義務。

平台將根據實際模型、調用方式、數據接收方所在地及適用法律，依法處理相關數據。如特定模型或功能涉及跨境傳輸個人信息或其他受保護數據，平台將在實施前依法履行必要的告知、同意、評估、合同安排或其他合規程序。

不同第三方模型服務提供商對請求內容、日誌、保存期限及是否用於服務改進或模型訓練的政策可能不同。平台不會在缺乏事實依據時統一承諾所有模型均實行“零數據留存”或絕不用於訓練。具體規則以平台針對相應模型依法披露的信息及實際有效的服務安排爲準。

您不應在非必要情況下向模型提交身份證件、金融賬戶、精確位置、醫療健康、生物識別信息、未成年人信息、商業祕密、保密資料或其他敏感內容。您提交包含他人個人信息或受保護內容的數據前，應確保具有合法處理依據並已取得必要授權。

若平台發現第三方的數據處理方式可能對用戶權益造成重大影響，將依法採取風險提示、限制調用、暫停接入、更換服務商或停止服務等必要措施。

因模型服務提供商、API 技術服務商、模型聚合服務商、雲計算或網絡基礎設施服務商自身的違法行爲、違反合同約定、超出授權範圍處理數據、安全措施缺陷或其他超出平台合理控制範圍的原因造成損害的，由實際責任方依法承擔相應責任。平台將在法律規定及自身職責範圍內採取必要的應急處置、用戶通知、協助調查和風險緩解措施；在平台已經履行合理選擇、合同約束、監督管理及安全保障義務，且損害並非因平台故意、重大過失或違反法定義務造成的情況下，平台在法律允許範圍內按照自身過錯程度和實際因果關係承擔責任。

如平台因上游服務商的違法行爲、違約行爲或安全事件先行承擔賠償、補救或其他責任，平台有權依法依約向相關責任方追償。

第六章 模型可用性與服務變更

不同第三方模型的可用性可能因技術維護、供應商策略調整、商業合作變化、網絡環境、監管要求或其他客觀原因發生變化。

平台可根據實際情況對模型服務進行新增、升級、降級、暫停、恢復、替換或下線。涉及用戶權益的重大變化，平台將依照適用法律及《用戶協議》，儘可能通過官方網站、控制台公告、站內通知、電子郵件或其他合理方式提前通知；因緊急安全風險、監管要求或平台無法控制的突發事件無法提前通知的除外。

因第三方模型服務提供商原因，可能發生下列情形：

(一) 模型暫停服務或停止營運；

(二) 模型版本升級、遷移或下線；

(三) 模型響應速度、穩定性或服務質量變化；

(四) Token 或其他計量、計費規則調整；

(五) 模型能力、功能或安全策略變化；

(六) 調用額度、地區、行業或場景限制變化；

（七）第三方服務異常或中斷。

發生上述情形時，平台將在法律允許的範圍內，根據原因、可控程度及自身是否已盡合理義務承擔相應責任。平台不會僅以第三方原因作爲免除自身全部責任的依據。對於已經發生的調用或交易，除法律法規另有規定或用戶另行同意外，不因後續規則變化追溯調整其計費結果。

如平台發現某一模型存在重大安全風險、法律合規風險，或持續無法正常提供服務，有權立即限制或停止提供該模型接入服務，無需事先徵得用戶同意；平台將依法採取必要的通知、餘額處理、替代方案或其他用戶權益保障措施。

第七章 服務區域及模型限制

由於不同國家或地區的法律法規、出口管制或制裁規則、商業合作安排及技術條件存在差異，不同模型可能適用於不同地區。

部分模型可能存在以下限制：

（一）僅支持中國大陸地區；

（二）僅支持中國大陸以外的特定地區；

（三）僅支持企業用戶或實名認證用戶；

（四）僅支持特定行業、業務場景或用途；

（五）僅支持符合模型提供商規則的用戶；

（六）其他依法或依約設置的限制條件。

平台有權根據適用法律法規、監管要求、模型服務提供商要求或業務需要，對部分模型設置訪問限制、功能限制或調用限制。

用戶不得通過僞造身份、隱瞞真實服務區域、冒用他人賬號、使用技術手段規避訪問控制或其他方式繞過平台依法設置的限制。前述約定不限制用戶依法使用合法網絡安全、隱私保護或企業網絡工具，但用戶不得利用相關工具規避依法或依約適用的區域、身份及用途限制。

第八章 第三方條款的適用

不同第三方模型可能適用其各自依法制定並公佈的服務條款、隱私政策、可接受使用政策（Acceptable Use Policy）或其他相關規則。

平台將在合理可行的範圍內，通過模型詳情頁、控制台、API 文檔、鏈接或其他適當方式向用戶提示與其使用直接相關的重要第三方規則。僅以籠統方式要求用戶自行查找未知規則，不應視爲平台已完成依法應履行的告知義務。

當您主動選擇調用某一第三方模型時，除遵守本平台相關協議外，還應遵守平台已向您合理提示且依法對您適用的第三方規則。如第三方模型服務提供商更新規則、調整模型能力、修改收費方式或限制特定用途，平台將根據實際情況調整相關服務，並依法履行必要的通知義務。

因用戶違反已被合理提示且依法適用的第三方規則，導致模型調用受限、服務暫停、賬號限制或其他損失的，用戶依法承擔相應責任；能夠證明系平台、第三方模型服務提供商或其他主體原因造成的，由相關責任方依法承擔責任。

第九章 模型輸出及責任限制

第三方模型輸出由算法自動生成，可能存在錯誤、遺漏、不完整、過時、虛構、偏差或不符合用戶預期等情形。用戶應根據使用目的，對輸出進行必要的審覈、驗證及人工判斷。

用戶不應將模型輸出直接作爲醫療、法律、金融、投資、稅務、安全生產、自動化控制、人身安全或其他高風險領域的唯一依據。法律法規對特定行業、場景或自動化決策另有要求的，用戶及平台均應遵守。

對於因第三方模型直接導致的下列情形，平台在法律允許範圍內根據自身過錯、因果關係及可控程度承擔責任：

（一）模型輸出錯誤、遺漏、不完整、過時或存在事實偏差；

（二）模型生成內容涉嫌侵犯第三方合法權益；

（三）模型服務暫停、中斷、升級或終止；

（四）第三方調整收費標準、調用限制或服務策略；

（五）第三方的數據處理方式發生變化；

（六）第三方模型不可用對用戶業務造成影響；

（七）其他主要由第三方模型服務提供商造成的損失。

上述責任限制不適用於法律法規明確規定不得限制或免除責任的情形，也不免除平台因故意、重大過失、違反法定義務、違反明確承諾或未採取依法應採取的安全和管理措施所應承擔的責任。

平台不對任何模型的持續可用性、完全準確性或特定用途適用性作超出法律規定及平台明確承諾範圍的保證。對於企業用戶或業務連續性要求較高的用戶，建議配置模型切換、人工複覈、限額控制、異常重試、數據脫敏及業務降級機制。

第十章 用戶權利與諮詢

如您對某一模型的數據接收方、處理方式、服務區域、限制條件、計費規則或第三方條款存在疑問，可通過平台公佈的客服或隱私聯繫渠道進行諮詢。

對於依法需要披露或提供查詢的事項，平台將根據《隱私政策》及適用法律處理用戶的訪問、更正、刪除、撤回同意、註銷賬號或其他權利請求。

如您不同意某一第三方模型的數據處理方式或適用規則，請勿選擇或繼續調用該模型。您仍可在平台實際提供且符合您需求的範圍內選擇其他模型；但某項服務僅能通過特定模型實現的，停止使用該模型可能導致相應功能無法使用。

第十一章 附則

本說明是《用戶協議》的組成部分，與《隱私政策》《充值服務協議》《AI 服務使用規範》《數據安全承諾》等平台規則共同構成您使用本平台服務的協議體系。

平台可根據法律法規變化、第三方模型服務變化、監管要求或業務發展，對本說明進行更新。涉及用戶權益重大變化的，平台將依法通過官方網站、控制台、站內通知、電子郵件或其他合理方式通知，並給予用戶合理的知悉機會。更新內容的生效時間以公告或通知所載日期爲準；法律法規另有規定的，從其規定。

如本說明與適用法律法規存在衝突，以法律法規的規定爲準。本說明任何條款被認定爲無效、被撤銷或不可執行的，不影響其他條款的效力。

本說明的訂立、生效、履行、解釋及爭議解決，適用香港特別行政區法律。因本說明引起或與本說明有關的任何爭議，雙方應先友好協商；協商不成的，任何一方可向香港特別行政區有管轄權的法院提起訴訟。

以下英文內容僅供參考。如中英文內容存在差異，以繁體中文版本為準。
The English text below is provided for reference only. In the event of any discrepancy, the Traditional Chinese version shall prevail.

Third-Party Model Services Notice

Version: V1.0

Effective Date: July 10, 2026

Last Updated: July 10, 2026

Chapter 1 General Provisions

Welcome to the AI model aggregation services provided by APIporter (https://apiporter.com, hereinafter referred to as the "Platform"). The Platform is operated by CloudBridge AI Technology Limited, a company incorporated in Hong Kong.

Through a unified interface, the Platform connects to artificial intelligence models developed, operated, or lawfully licensed and provided by third-party organizations, and provides users with model invocation, account management, billing and settlement, and related technical services.

This Third-Party Model Services Notice (hereinafter referred to as this "Notice") is intended to help you understand the sources of third-party models, the manner in which services are provided, necessary data transfers, and the allocation of responsibilities between the Platform and third-party model service providers.

This Notice forms an integral part of the User Agreement and applies together with the Privacy Policy, Recharge Service Agreement, AI Service Use Rules, Data Security Commitment, and other Platform rules. If this Notice is inconsistent with any special rules governing a specific matter, the special rules that lawfully apply and expressly address that matter shall prevail.

Chapter 2 Description of Third-Party Models

The artificial intelligence model families that the Platform may connect to include, but are not limited to:

(1) OpenAI model families;

(2) Anthropic Claude model families;

(3) Google Gemini model families;

(4) xAI Grok model families;

(5) DeepSeek model families;

(6) Zhipu AI (GLM) model families;

(7) Tongyi Qianwen model families;

(8) Kimi (Moonshot AI) model families;

(9) Doubao model families;

(10) MiniMax model families;

(11) iFLYTEK Spark model families;

(12) Other models subsequently and lawfully connected to the Platform.

The above list is provided solely to describe the range of models that the Platform may offer. It does not indicate that all models are currently available, nor that the same model may be used in all regions, by all account types, or in all business scenarios. The models actually available and their applicable regions shall be determined by the information published on the product pages, console, model list, or API documentation at the time of invocation.

Model names, trademarks, and related identifiers belong to their respective rights holders. Unless expressly stated otherwise, the Platform's display of a model name does not indicate an agency, authorized distribution, joint operation, or any other legal relationship between the Platform and the relevant rights holder beyond the actual cooperation relationship.

The models, versions, functions, context lengths, service regions, billing methods, and restrictions actually provided by the Platform shall be determined by the information published on the console, product pages, model list, or API documentation at the time of invocation.

Chapter 3 Relationship Between the Platform and Third-Party Model Service Providers

The Platform is an artificial intelligence model aggregation service platform. Except for models or functions independently developed and expressly identified by the Platform, the Platform is generally not the developer, trainer, or implementer of the underlying algorithms of third-party models.

The Platform primarily provides the following services:

(1) Unified model access and request routing;

(2) Identity authentication and access control;

(3) API gateway and request forwarding;

(4) Statistics for invocation volume, Tokens, or other units of measurement;

(5) Billing, balance, and account management;

(6) Model presentation, risk notices, and necessary content-safety measures;

(7) Incident handling, technical support, and Platform operations;

(8) Other obligations that laws and regulations require the Platform to perform.

Third-party model service providers are responsible for the research and development, training, algorithm optimization, inference services, model-side safety policies, and related technical implementation of their models. This does not, however, relieve the Platform of its legal obligations regarding model access management, service security, personal information protection, data security, user notification, and other statutory duties.

Based on applicable laws and regulations, the cooperation model, and the level of risk, the Platform will conduct necessary selection, assessment, contractual control, security management, and ongoing supervision of third-party model service providers. The Platform cannot control all technical or operational decisions independently made by third parties, but will bear corresponding responsibility for matters within its control and for which it is legally responsible.

Chapter 4 Description of Data Transfers

When you actively choose to use a third-party model, the Platform may, to the extent necessary to complete model inference and return results to you, transmit relevant data to model service providers, API technical service providers, model aggregation service providers, cloud computing or network infrastructure service providers, and other necessary service providers that lawfully participate in the invocation chain. Depending on the specific service chain, these service providers may access relevant data to the extent necessary to complete the request.

Depending on the model and function, the data transmitted may include:

(1) Text and instructions (Prompts) entered by you;

(2) Images, audio, video, documents, or other files voluntarily uploaded by you;

(3) Conversation context necessary to enable continuous dialogue;

(4) Model name, version, and inference parameters;

(5) Request identifier, interface version, timestamp, and necessary security or troubleshooting information;

(6) Other data necessary to provide a specific function.

After a third-party model completes inference, the generated result will be returned to the Platform, which will then display it to you or return it to you through an API. In principle, the Platform processes relevant data only to the extent necessary for model invocation, metering and billing, security assurance, incident handling, and fulfillment of statutory obligations.

The specific data recipients, processing purposes, processing methods, data types, and retention rules may vary depending on the model, service region, invocation method, and actual supply chain. The relevant service chain may include one or more layers of providers that lawfully participate in request forwarding, model access, or infrastructure services, and may change with model versions, interface methods, or supplier relationships. The Platform will provide necessary information through the Privacy Policy, model detail pages, third-party information lists, console notices, or other reasonable means. Where consent, separate consent, or written consent is legally required, the Platform will obtain it separately.

Chapter 5 Data Processing and Allocation of Responsibilities

The Platform is responsible for fulfilling its legal protection obligations for personal information and other protected data that it collects, stores, and processes, and will process relevant data in accordance with the Privacy Policy and applicable laws and regulations.

Third-party model service providers may have different processing roles with respect to received data. In some circumstances, they may process data on the Platform's instructions; in others, they may lawfully process data as independent personal information processors or data controllers. The Platform will clarify the corresponding roles based on the actual cooperation relationship and fulfill obligations such as notification, contractual control, security assessment, and supervision and management in accordance with law.

The Platform will lawfully process relevant data based on the actual model, invocation method, location of the data recipient, and applicable law. If a specific model or function involves a cross-border transfer of personal information or other protected data, the Platform will, before implementing such transfer, complete necessary notification, consent, assessment, contractual arrangements, or other compliance procedures in accordance with law.

The policies of different third-party model service providers concerning request content, logs, retention periods, and whether data is used for service improvement or model training may differ. In the absence of a factual basis, the Platform will not make a uniform commitment that all models apply "zero data retention" or that data will never be used for training. The specific rules shall be subject to the information lawfully disclosed by the Platform for the relevant model and the service arrangements actually in effect.

You should not submit identity documents, financial accounts, precise location, medical or health information, biometric information, information concerning minors, trade secrets, confidential materials, or other sensitive content to a model unless necessary. Before submitting data containing another person's personal information or protected content, you must ensure that you have a lawful basis for processing and have obtained all necessary authorization.

If the Platform discovers that a third party's data-processing practices may materially affect users' rights and interests, it will take necessary measures in accordance with law, such as issuing risk notices, restricting invocation, suspending access, replacing the service provider, or discontinuing the service.

Where damage is caused by unlawful conduct, breach of contract, processing of data beyond the authorized scope, deficiencies in security measures, or other causes beyond the Platform's reasonable control attributable to a model service provider, API technical service provider, model aggregation service provider, cloud computing or network infrastructure service provider, the party actually responsible shall bear corresponding liability in accordance with law. The Platform will, within the scope required by law and its own responsibilities, take necessary emergency response, user notification, investigation assistance, and risk-mitigation measures. Where the Platform has fulfilled its obligations regarding reasonable selection, contractual control, supervision and management, and security assurance, and the damage was not caused by the Platform's willful misconduct, gross negligence, or breach of statutory duties, the Platform shall, to the extent permitted by law, bear liability according to the degree of its own fault and the actual causal relationship.

If the Platform first bears compensation, remediation, or other liability due to unlawful conduct, breach of contract, or a security incident attributable to an upstream service provider, the Platform has the right to seek recovery from the responsible party in accordance with law and contract.

Chapter 6 Model Availability and Service Changes

The availability of different third-party models may change due to technical maintenance, adjustments to supplier policies, changes in commercial cooperation, network conditions, regulatory requirements, or other objective reasons.

The Platform may add, upgrade, downgrade, suspend, restore, replace, or discontinue model services based on actual circumstances. For material changes affecting users' rights and interests, the Platform will, in accordance with applicable law and the User Agreement, endeavor to provide advance notice through the official website, console announcements, in-platform notifications, email, or other reasonable means, except where advance notice is impossible due to urgent security risks, regulatory requirements, or unexpected events beyond the Platform's control.

The following circumstances may arise for reasons attributable to third-party model service providers:

(1) Suspension of model services or cessation of operations;

(2) Model version upgrade, migration, or discontinuation;

(3) Changes in model response speed, stability, or service quality;

(4) Adjustments to Token or other metering and billing rules;

(5) Changes in model capabilities, functions, or safety policies;

(6) Changes in invocation quotas or restrictions by region, industry, or scenario;

(7) Abnormality or interruption of third-party services.

If any of the above circumstances occurs, the Platform will, to the extent permitted by law, bear corresponding responsibility based on the cause, the degree of control, and whether it has fulfilled its reasonable obligations. The Platform will not rely solely on the involvement of a third party as a basis for disclaiming all of its own responsibility. For invocations or transactions already completed, billing results will not be adjusted retroactively due to subsequent rule changes, unless otherwise required by laws or regulations or separately agreed by the user.

If the Platform discovers that a model presents a material security risk or legal compliance risk, or remains unable to provide services normally, it has the right to immediately restrict or discontinue access to that model without obtaining the user's prior consent. The Platform will take necessary measures in accordance with law to protect users' rights and interests, including notification, balance handling, alternative solutions, or other measures.

Chapter 7 Service Regions and Model Restrictions

Because laws and regulations, export control or sanctions rules, commercial cooperation arrangements, and technical conditions differ among countries and regions, different models may be available in different regions.

Some models may be subject to the following restrictions:

(1) Available only in Mainland China;

(2) Available only in specified regions outside Mainland China;

(3) Available only to enterprise users or verified users;

(4) Available only for specified industries, business scenarios, or purposes;

(5) Available only to users who comply with the model provider's rules;

(6) Other restrictions established in accordance with law or contract.

The Platform has the right to impose access, functional, or invocation restrictions on certain models based on applicable laws and regulations, regulatory requirements, model service provider requirements, or business needs.

Users must not circumvent restrictions lawfully imposed by the Platform by falsifying identity, concealing the actual service region, using another person's account, employing technical means to evade access controls, or by any other means. The foregoing does not restrict users from lawfully using legitimate cybersecurity, privacy-protection, or enterprise network tools, but users must not use such tools to evade regional, identity, or use restrictions that apply by law or contract.

Chapter 8 Application of Third-Party Terms

Different third-party models may be subject to their respective lawfully established and published terms of service, privacy policies, Acceptable Use Policies, or other relevant rules.

To the extent reasonably practicable, the Platform will notify users of important third-party rules directly relevant to their use through model detail pages, the console, API documentation, links, or other appropriate means. Merely requiring users in general terms to locate unknown rules on their own shall not be deemed fulfillment of the Platform's legally required notification obligations.

When you actively choose to invoke a third-party model, in addition to complying with the Platform's relevant agreements, you must also comply with third-party rules that the Platform has reasonably brought to your attention and that lawfully apply to you. If a third-party model service provider updates its rules, adjusts model capabilities, changes charging methods, or restricts specified uses, the Platform will adjust the relevant services according to actual circumstances and fulfill any necessary notification obligations in accordance with law.

If a user violates third-party rules that have been reasonably brought to the user's attention and lawfully apply, thereby causing restricted model invocation, suspension of service, account restrictions, or other losses, the user shall bear corresponding responsibility in accordance with law. Where it can be shown that the cause is attributable to the Platform, a third-party model service provider, or another party, the relevant responsible party shall bear liability in accordance with law.

Chapter 9 Model Outputs and Limitation of Liability

Outputs of third-party models are automatically generated by algorithms and may contain errors, omissions, incompleteness, outdated information, fabrications, bias, or results that do not meet users' expectations. Users should conduct necessary review, verification, and human judgment based on the intended use.

Users should not rely on model outputs as the sole basis for medical, legal, financial, investment, tax, workplace safety, automated control, personal safety, or other high-risk matters. Where laws or regulations impose additional requirements on specific industries, scenarios, or automated decision-making, both users and the Platform must comply.

For the following circumstances directly caused by a third-party model, the Platform shall bear responsibility, to the extent permitted by law, according to its own fault, causation, and degree of control:

(1) Errors, omissions, incompleteness, outdated information, or factual inaccuracies in model outputs;

(2) Model-generated content that may infringe the lawful rights and interests of third parties;

(3) Suspension, interruption, upgrade, or termination of model services;

(4) Adjustments by third parties to charging standards, invocation restrictions, or service policies;

(5) Changes in a third party's data-processing practices;

(6) Impact on a user's business caused by the unavailability of a third-party model;

(7) Other losses primarily caused by a third-party model service provider.

The above limitations of liability do not apply where laws or regulations expressly prohibit the limitation or exclusion of liability, nor do they relieve the Platform of liability arising from willful misconduct, gross negligence, breach of statutory duties, breach of express commitments, or failure to take legally required security and management measures.

The Platform makes no guarantee regarding the continuous availability, complete accuracy, or fitness for a particular purpose of any model beyond the scope required by law and expressly committed to by the Platform. Enterprise users or users with heightened business-continuity requirements are advised to configure model switching, human review, quota controls, exception retries, data masking, and business-degradation mechanisms.

Chapter 10 User Rights and Inquiries

If you have questions about a model's data recipients, processing methods, service regions, restrictions, billing rules, or third-party terms, you may contact the Platform through its published customer-service or privacy contact channels.

For matters that must be disclosed or made available for inquiry in accordance with law, the Platform will handle users' requests for access, correction, deletion, withdrawal of consent, account cancellation, or other rights in accordance with the Privacy Policy and applicable law.

If you do not agree with a third-party model's data-processing practices or applicable rules, do not select or continue to invoke that model. You may still choose other models actually offered by the Platform that meet your needs. However, where a service can be implemented only through a specific model, discontinuing use of that model may make the corresponding function unavailable.

Chapter 11 Supplementary Provisions

This Notice forms an integral part of the User Agreement and, together with the Privacy Policy, Recharge Service Agreement, AI Service Use Rules, Data Security Commitment, and other Platform rules, constitutes the agreement framework governing your use of the Platform's services.

The Platform may update this Notice in response to changes in laws and regulations, third-party model services, regulatory requirements, or business development. For material changes affecting users' rights and interests, the Platform will provide notice in accordance with law through the official website, console, in-platform notifications, email, or other reasonable means, and will give users a reasonable opportunity to become informed. Updated content will take effect on the date stated in the announcement or notice, unless otherwise provided by laws or regulations.

If this Notice conflicts with applicable laws or regulations, the provisions of such laws or regulations shall prevail. If any provision of this Notice is determined to be invalid, rescinded, or unenforceable, the validity of the remaining provisions will not be affected.

The formation, effectiveness, performance, interpretation, and dispute resolution of this Notice shall be governed by the laws of the Hong Kong Special Administrative Region. Any dispute arising out of or in connection with this Notice shall first be resolved through amicable consultation between the parties. If consultation fails, either party may bring proceedings before a court of competent jurisdiction in the Hong Kong Special Administrative Region.

CloudBridge AI Technology Limited
